

## CSS Comments

CSS comments are not displayed in the browser, but they can help document your source code.

### CSS Comments

Comments are used to explain the code, and may help when you edit the source code at a later date.

Comments are ignored by browsers.

A CSS comment is placed inside the `<style>` element, and starts with `/*` and ends with `*/`:

### Example

```
/* This is a single-line comment */
```

```
p {  
  color: red;  
}
```

You can add comments wherever you want in the code:

### Example

```
p {  
  color: red; /* Set text color to red */  
}
```

Comments can also span multiple lines:

### Example

```
/* This is  
a multi-line  
comment */
```

```
p {  
  color: red;  
}
```

## HTML and CSS Comments

From the HTML tutorial, you learned that you can add comments to your HTML source by using the `<!--...-->` syntax.

In the following example, we use a combination of HTML and CSS comments:

### Example

```
<!DOCTYPE html>  
<html>  
<head>  
<style>  
p {  
  color: red; /* Set text color to red */  
}  
</style>  
</head>  
<body>
```

```
<h2>My Heading</h2>
```

```
<!-- These paragraphs will be red -->
```

```
<p>Hello World!</p>
```

```
<p>This paragraph is styled with CSS.</p>
```

<p>CSS comments are not shown in the output.</p>

</body>

</html>
